

# Dyflex Mining ByDesign Package

THE BEST RUN 

## Stay in control of your cost per tonne. Here's how.

Mining is a demanding business and the risk of cost blowouts are high and not unusual in the industry. A recent global research found that as many as 69% of the mining projects studied faced cost overruns averaging 62%.\* Accurate and timely cost management is vital in avoiding costs ballooning out of control. This can be achieved by putting the right people, systems and processes in place to monitor capital and operational expenditure.

## Do these challenges sound familiar to you?

At Dyflex Solutions, many of our projects began with customers, much like you, who want to stay in control of their cost per tonne but struggled with situations, such as:

## Book a (No-Obligation) Discovery Session

Interested to find out how the **Dyflex Mining ByDesign Package** can get your mining business up and running in 90 days or less?

Visit us at [www.dyflex.com.au](http://www.dyflex.com.au) to book a no-obligation Discovery Session so we can help you uncover your requirements and how we can best support you.

We don't have an IT team or IT internal resources and we don't have time to build one. Our priority lies in the development of our mining assets. We don't want to worry about building and maintaining an IT infrastructure and servers.

We use spreadsheets and various software to manage our finances, tenement reporting, and other processes. Reporting is tedious as the information sits in different systems. Accuracy is another big issue because of human error and duplicate data.

We manage several mines so we need to get an overall view of the entire company and still be able to zoom in on each project at any time.

We need a system that works for us now and one which we can scale easily when our transaction volume increases.

Our team is not desk bound. They spend a lot of time out in the field. They need be able to access accurate real-time data on-the-go using their mobile devices.

Having successfully deployed SAP ERP technology solutions for over 20 mining businesses in just 3 years, we are familiar with the common challenges faced by the industry. Our experience in mining motivated us to develop the **Dyflex Mining ByDesign Package** – an affordable and modern technology solution package designed to help mining organisations get ready for action in 90 days or less.
