Dyflex Cloud ERP Mining Package

THE BEST RUN SAP

Stay in control of your cost per tonne. Here's how.

Mining is a demanding business and the risk of cost blowouts are high and not unusual in the industry. A recent global research found that as many as 69% of the mining projects studied faced cost overruns averaging 62%.* Accurate and timely cost management is vital in avoiding costs ballooning out of control. This can be achieved by putting the right people, systems and processes in place to monitor capital and operational expenditure.

Do these challenges sound familiar to you?

At Dyflex Solutions, many of our projects began with customers, much like you, who want to stay in control of their cost per tonne but struggled with situations, such as:

Book a (No-Obligation) Discovery Session

Interested to find out how the **Dyflex Cloud ERP Mining Package** can get your mining business up and running 4 months or less?

Visit us at www.dyflex.com.au to book a no-obligation Discovery Session so we can help you uncover your requirements and how we can best support you.

Our ERP system is dated & we are struggling to scale it any further. We need a system to handle the increase in transaction volumes & one that can continue to scale with our growth.

We use spreadsheets & various software to manage our finances, tenement reporting & other processes. Reporting is tedious because the information sits in different systems. Accuracy is another big issue because of human error & duplicate data.

We manage several mines so we need to get an overall view of the entire company & still be able to zoom in on each project at any time.

We want to reduce our IT costs but we don't want to compromise on our IT security or end up with increased downtime or server issues.

Our team is not desk bound. They spend a lot of time out in the field. They need be able to access accurate real-time data on-the-go using their mobile devices.

Having successfully deployed **SAP ERP** technology solutions for over 20 mining businesses in just 3 years, we are familiar with the common challenges faced by the industry. Our experience in mining motivated us to develop the **Dyflex Cloud ERP Mining Package** – an affordable and modern technology mining solution which can be up and running in 4 months or less.
